re sourcing

This enhanced service is aimed at customers who work to standards set by third party protocols often issued by their own customer. Carried out by environmental graduate biologists or similar, inspection staff have a minimum of 10 years industry experience. The service includes a fully detailed report encompassing;

- re Evidence of pests found, current and past;
- re Condition of the structure with relevance to pest ingress;
- re Housekeeping and hygiene conditions that are conducive to the presence or likely presence of pests;
- re Pertinent external influences;
- re Digital colour photos are standard for ease of use;
- re Instant type written report provided at completion of inspection;
- re E-mail copies automatically sent to nominated recipients.

For customers needing to comply with food safety / health and safety legislation **reservice** is for you:

- Provision of contracted pest services to commerce and industry; 24 hours a day, 365 days per year service provision for rapid response to clients problems;
- Unique **retoxinfree**™ organic pesticide free services available including Cryonite® insect extermination, **reguard**™ electronic rodent monitoring and maintenance of fly control equipment including machines and screens;
- One off works service, from wasp nest destruction to bed bug eradication.
